

A.1 Trait architecture [Integration; Modularity]

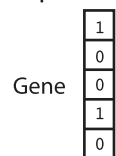

A.2 Pleiotropy matrix

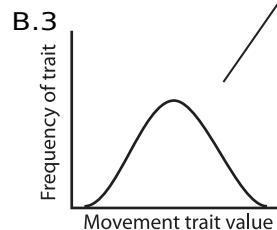

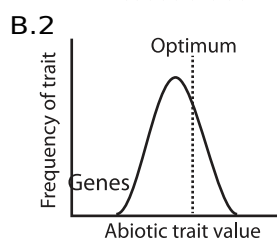

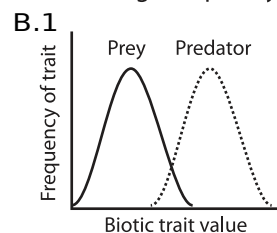

A.3 Epistasis matrix

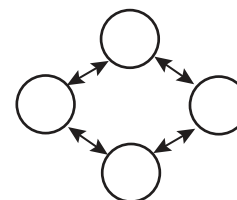

A.4 Expression vector

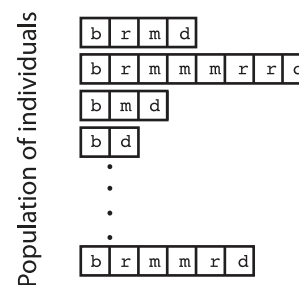

Selection [Trait matching; Frequency dependent]

C.1 Compute fitness at each site

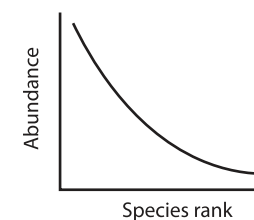

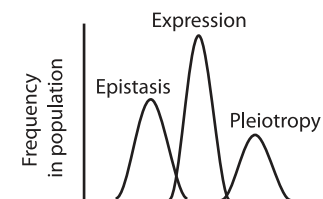

C.2 Simulate individual lifespans Birth (b); Move (m); Reproduce (r); Death (d)

C.3 Calculate population size at each site

C.4 Track biodiversity dynamics

C.5 Species interactions network
